

FALL PREVENTION IS THE BEST PROTECTION

How Do You Keep Everyone OSHA Compliant When You Can't Watch Them?

Take the Option of OSHA Compliance Out of the Hands of Your Workers

Use Guardrails & All Workers Are Fully Covered

- No Involvement or Training Needed by Individual Laborer
- No Lines or Ropes for Tangles
- No Memory Lapses or Improper Tying-off

Clearly Seen From the Street

- Inspectors Prefer Guardrails

OSHA eTool Says: "In general, it is better to use fall prevention systems, such as guardrails, than fall protection systems, such as safety nets or fall arrest devices..."

Reduce Costs

- Unlimited Useful Lifetime—Require Almost No Maintenance
- Help Adjust Your Workers Compensation Modifier

Stop Someone Before They Fall

- No Lost Work due to Harness Injury
- No Recovery Plan or Rescue Equipment Needed

Don't Let Someone Take Their Life & Your Livelihood In Their Hands!

"Dan Phillips, 57, runs a roofing company employing six people. One of his workers recently unlatched his safety rope momentarily, he said, while an inspector was watching down the street. 'If you watch a construction site long enough, someone is going to do something stupid,' Phillips said. The inspector counted three violations, resulting in \$23,000 in fines. 'That's still the profits for five or six jobs,' Phillips said. 'But the real problem I had is they said I willfully broke the rules. They acted like I was thumbing my nose at them, and I had just paid thousands of dollars in safety equipment to comply with those rules.' The fines stay on Phillips' record for four years, and he has to notify OSHA every Monday where his crews will be."

RESIDENTIAL GUARD RAIL
#12070: EAVE & #12075: RAKE

PARAPET GUARD RAIL #12090

GUARDRAILS #12045 & #12060

ACRO SOLUTIONS FOR ANY ENVIRONMENT

RESIDENTIAL GUARDRAIL SYSTEM

- TWO Brackets; one solution: #12070 for Eave Edges & #12075 for Rake Edges
- Interleaves with shingles: Nails On & Taps Off (just like roof brackets)

PARAPET CLAMP GUARDRAIL #12090

- Adjusts to wall width from 4" to 24" wide
- Post is Height Adjustable for use on lower and higher parapets

FLAT ROOF #12060 & VERTICAL #12045 GUARDRAILS

- Screw, Bolt or Weld to almost any surface
- Ideal for protecting workers from any hole, opening or edge
